Professional Summary

CS undergraduate (VIT Vellore, CGPA 8.48) who builds systems that solve real business problems — built and deployed BillMate, a POS system actively used by real retail vendors, where technical decisions like guaranteeing atomic transactions via PostgreSQL RPCs were driven by real business constraints. Beyond engineering, I've coordinated cross-functional teams of 10+ members through college fests and clubs, translating priorities across stakeholders to deliver on shared outcomes. Currently sharpening DSA and backend engineering. Seeking full-time SDE / Analyst roles for 2027.

Education

B.Tech – Computer Science Engineering	2023–2027
Vellore Institute of Technology, Vellore	CGPA: 8.48
Class XII (Karnataka State Board)	2023
Narayana CO Campus , Bangalore	Percentage: 89%
Class X (CBSE)	2021
Narayana Olympiad School , Bangalore	Percentage: 86.6%

Technical Projects

BillMate – POS & Retail Management System

Tech Stack: React, Vite, Supabase, PostgreSQL

[Link](#)

- Built a POS system supporting billing, inventory tracking, and customer credit management for small retail vendors
- Implemented 5+ modules including sales tracking, refunds, supplier management, and expense logging
- Engineered atomic transaction guarantees for sales and inventory using PostgreSQL RPC functions — preventing stock/sales desync that would otherwise cost vendors real revenue and trust
- Integrated Supabase Authentication and Row-Level Security for secure multi-user access
- Implemented PWA functionality enabling mobile-first usage

Turf Mobile Application – Sports Event Coordination App

Tech Stack: React Native, Expo, TypeScript, Supabase

- Developed a cross-platform mobile application enabling sports event discovery and coordination
- Implemented 5+ core features including authentication, real-time chat, event creation, location services, and user profiles
- Designed workflows for participant management, game planning, and cost splitting
- Integrated real-time backend services using Supabase

Experience

Marketing Intern – Edvensoft Solutions

May 2025 – June 2025

- Conducted market and competitor analysis across 10+ companies to support campaign strategy
- Organized and analyzed customer data and campaign performance metrics

Skills

Languages: C, C++, Java, JavaScript, TypeScript
Frontend / Backend: REST APIs, HTML, CSS
Frameworks: React, React Native, Spring Boot, Expo
Databases: PostgreSQL, Supabase
Tools: Git, GitHub
CS Fundamentals: Data Structures & Algorithms, System Design basics, Object-Oriented Programming

Leadership & Campus Involvement

Co-Secretary, Matrix - The Multimedia Club

- Coordinated and managed 10+ events and workshops with 100+ participants
- Collaborated with cross-functional teams of 10+ members to execute multimedia initiatives
- Led promotion and engagement efforts to increase event participation
- Maintained event documentation and scheduling for smooth club operations

Organizing Committee Member — Riviera / GraVITas, VIT

- Contributed to the planning and execution of one of VIT's largest festivals
- Managed event coordination and participant support during the fest
- Collaborated with cross-functional teams to handle logistics and operations
