Professional Summary

CS undergraduate (VIT Vellore, CGPA 8.48) who takes ideas from problem to shipped product — built and deployed BillMate, a POS system actively used by real retail vendors, owning everything from database design to UX decisions to production deployment. Every technical choice, like guaranteeing atomic transactions via PostgreSQL RPCs, was driven by a real user constraint, not just code correctness. I've also coordinated cross-functional teams of 10+ members through college fests and clubs, aligning stakeholders around shared outcomes. Currently sharpening DSA and backend engineering. Seeking full-time SDE / Analyst / Product roles for 2027.

Education

Vellore Institute of Technology, Vellore

2023 – 2027

B.Tech — Computer Science Engineering; CGPA: 8.48

Narayana CO Campus, Bangalore

2023

Class XII (Karnataka State Board); Percentage: 89%

Technical Projects

BillMate — POS & Retail Management System | Live demo

Tech Stack: React, Vite, Supabase, PostgreSQL

- Built and deployed a POS system currently used by real retail vendors for daily billing, inventory tracking, and customer credit management
- Engineered atomic transaction guarantees for sales and inventory using PostgreSQL RPC functions — preventing stock/sales desync that would otherwise cost vendors real revenue and trust
- Implemented 5+ modules including sales tracking, refunds, supplier management, and expense logging
- Integrated Supabase Authentication and Row-Level Security for secure multi-user access control

Campus ClubHub — Student Club & Event Portal | Live demo

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS

- Built a role-segregated event platform with separate student and organizer authentication flows based on institutional email domains
- Implemented digital event passes with real-time SVG QR code generation and Google Calendar/.ics sync for fast door verification
- Built an organizer console with live occupancy/registration KPIs, real-time attendee rosters, and CSV export for event management

Turf — Sports Event Coordination App

Tech Stack: React Native, Expo, TypeScript, Supabase

- Built a cross-platform mobile app for sports event discovery, coordination, and participant management
- Implemented 5+ core features including authentication, real-time chat, event creation, location services, and cost-splitting workflows via Supabase

Experience

Marketing Intern

May 2025 – June 2025

Edvensoft Solutions

- Conducted market and competitor analysis across 10+ companies to support campaign strategy
- Organized and analyzed customer data and campaign performance metrics to inform decision-making

Leadership & Campus Involvement

Co-Secretary — Matrix, The Multimedia Club

Jan 2025 – Jan 2026

- Led a team of 10+ members to coordinate and execute 10+ events and workshops reaching 100+ participants

Organizing Committee Member — Riviera / GraVITAS, VIT

Sep 2024 – Present

- Coordinated logistics and cross-team operations for one of VIT's largest annual fests

Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript

Frontend / Backend: REST APIs, HTML, CSS

Frameworks: React, React Native, Spring Boot, Expo, Tailwind CSS

Databases: PostgreSQL, Supabase

Tools: Git, GitHub

CS Fundamentals: Data Structures & Algorithms, System Design basics, Object-Oriented Programming
